RAVENOL Petrol Clean Extreme

Kategorie: Additives

Artikelnummer: 1390207

0.3L | 1390207-300

RAVENOL Petrol Clean Extreme is a highly effective fuel additive for all types of gasoline engines for intensive cleaning of the entire fuel system from the tank to the combustion chamber.

RAVENOL Petrol Clean Extreme effectively removes micro-scale deposits on injection valves and fuel distributors, thus ensuring precision control of fuel injection valves. The formation of new deposits is prevented.

RAVENOL Petrol Clean Extreme restores full engine performance and reduces fuel consumption and pollutant emissions.

RAVENOL Petrol Clean Extreme protects the fuel system against corrosion.

Application instructions

RAVENOL Petrol Clean Extreme is added to the benzin/petrol before refueling. Area of application:

- Benzin/Petrol-operated engines

- Can be used preventively at every service

- In the event of increased fuel consumption

- For all benzin/petrol injection engines with or without catalytic converter, especially for direct injection systems

Application:

Pour the contents of the container into the tank. Repeat use every 6000 km or if necessary. The ideal dosage is one can of **RAVENOL Petrol Clean Extreme** per 60-75 litres of benzin/petrol.

Characteristics

- Cleaning of the fuel system from the tank to the combustion chamber
- Suitable for all types of injection systems, also for direct injection systems
- Guaranteed functionality of catalytic converter and lambda probe
- Saving of fuel by means of precise fuel injection and nebulisation
- Corrosion protection
